

Alpha ESTELITE α

Simplified Aesthetic Restoratives

Superior & Long Lasting Gloss

Thanks to Supra Nano Spherical Filler, very smooth surface having superior gloss can be obtained after easy polish and sustained for long term same as natural teeth.

SURFACE (IMAGE)

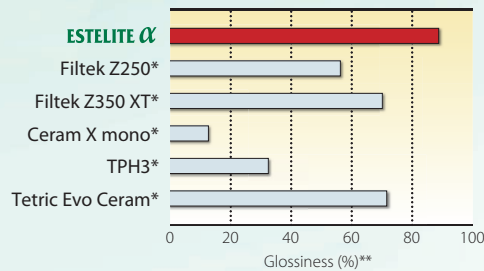

ESTELITE α

Other brand with irregular shaped filler

Glossiness

Supra Nano Spherical Filler

Silica-zirconia fillers produced by Sol-Gel Method have controlled size(0.2 μ m), multiple refractive indices and rounded shape like a pearl. ESTELITE α contains over 30 billion pieces of Supra Nano Spherical Filler in one syringe.

Sol-Gel Method

Excellent Color Match

With only 4 basic shades (A1, A2, A3, A3.5) and 2 opalescent shades (OA2, OA3), most cases can be recreated very naturally, blending with surrounded teeth. This excellent color match features can be offered by filler and monomer which have controlled, multiple refractive indices.

Ideal Wear Properties

Despite its excellent wear-resistance, ESTELITE α does not cause wear in the opposing teeth due to innumerable Supra Nano Spherical Fillers contained in the paste.

SIMPLIFIED SHADE TAKING

a) Above tooth shades are selected according to the VITA Shade Guide. VITA is a registered trademark of VITA Zahnfabrik H. Rauter GmbH & Co.KG.

b) Opalescent shades(OA2, OA3) are slightly more opacous than other A shades, which are suitable to prevent appearance from becoming grayish in class III and class IV restorations

PHYSICAL PROPERTIES

Flexural Strength (MPa)	115
Flexural Modulus (GPa)	9.8
Compressive Strength (MPa)	368
Shrinkage (%)	1.3
Radiopacity (%Al)	190
